

SELECTED REPERTOIRE FOR ORGAN AND ORCHESTRA

(last updated 11/15/18)

This listing, which is neither scholarly nor in any way exhaustive (though likely exhausting to ponder!), grew out of my own curiosity. It derives from a variety of sources, including my personal library of recordings and, most recently, a reviewing of the “Bibliography of Concertos for Organ and Orchestra” compiled by **Richard H. Satorius**. Published in 1961 by ‘The Instrumentalist Co.’, 1418 Lake Street, Evanston, IL, the Satorius pamphlet (long out of print, but available in many library collections) provides a much more detailed accounting of the provenance of many of the pieces enumerated below which I merely list as a convenient reference point. Heavens, there is a lot of repertoire for organ and ‘orchestra’!

NOTE: items with the composer name in CAPS represent the most significant organ/orchestra collaborations. An **asterisk (*)** indicates that the organ is featured in an important solo role, as in a concerto or ‘organ symphony’. Those items in **bold face** are orchestral repertoire selections in which the organ part is significant and prominent but not soloistic. In the other works, the organ part is ‘obligato’, an additional ‘voice’ in the orchestral texture, where its presence, though perhaps not essential, nonetheless adds to the overall visceral/emotional impact of the piece.

If nothing else, perhaps this eye-popping list will encourage players (and conductors) to look beyond the ‘standard few’ works that are persistently trotted out. At least some of these others may not deserve their obscurity.

Best wishes,

Michael Barone
